

# Mount Hood

## Use in brewing:

It is generally perceived as an aroma variety with similar characteristics to the German Hallertauer Mittlefruh and Hersbrucker varieties. The cones contains a moderate amount of lupulin that is yellow in colour. In British style ales the flavour comes through as delicate, floral and slightly herbal aroma.

## Substitutions:

Crystal, Hersbrucker, Mittlefruh, Strisselspalt

## Origin/History:

The Mount Hood cultivar variety that was developed in Oregon. It is a triploid seedling of the Hallertauer variety. It was selected from a cross between the tetraploid Hallertauer Mittlefruh and an aroma type male.

## Agronomics:

Mount Hood is a good yielding aroma variety that matures early to mid-season. Now grown commercially in Washington, Oregon and Idaho. It is somewhat tolerant to Downy Mildew. Aphids and spider mite control is not a serious problem.

## Storage:

Poor to Moderate.

Herbal, Grapefruit, Lemon
