

Northdown

Use in brewing:

An excellent all round dual-purpose hop with good alpha and aroma properties. Very popular used either on its own or in conjunction with an aroma variety. A slightly richer flavour than Challenger although quite similar in many other ways.

Substitutions:

Challenger, Northern Brewer

Origin/History:

Northdown was released by Wye College in 1970; it is a seedling of Northern Brewer, crossed with a Downy mildew-resistant male. It is an "aunt" of Challenger and Target. It provides cheaper alpha acid than many traditional varieties, while having excellent flavour properties

Organic Status:

Also available in Organic

Storage:

Very Good.

Spice, Cedar, Pine
